

Altamira is Committed to Delivering Practical and Effective Solutions

Altamira’s comprehensive PSM training and consulting services help our clients identify and manage risks associated with their operations. Risk identification methodologies include various techniques of Process Hazards Analysis (PHA), including HAZOP and “What If” checklists. Our professionals have decades of process safety experience in the energy, chemical, food & beverage, and industrial industries that use OSHA’s PSM or EPA’s RMP regulations, bringing practical application to risk mitigation.

Process Safety Management

A sound Process Safety Management (PSM) program has impacts well beyond safety and is imperative in business continuity, loss control, regulatory compliance, and environmental protection. Altamira’s process safety consultants are a well-established team who can audit, develop, implement, and/or maintain your process safety program at all stages of operation. Our consultants use a risk-informed approach, combined with deep knowledge of the underlying codes and standards and practical engineering expertise to develop programs tailored to your business needs whether your facility is subject to PSM compliance or not.

Altamira offers Process Hazard Analysis, Program Audits and Inspections, Consulting, Program Development, and Training in compliance with 29 CFR 1910.119 and 40 CFR Part 68. We design our services to keep your employees safe and your company compliant with OSHA’s PSM of Highly Hazardous & Explosive Chemicals and EPA’s Risk Management Program (RMP) regulations. A few specific services include:

Corporate Policy

- Company Policies and Procedure
- Training Program
- Employee Participation
- Management of Change (MOC)
- Procedure Program

Corporate Program

- Compliance Program Overview
- Mechanical Integrity Program (MIP)
- EPA RMP Program Level
- Facility Management
- Trade Secrets

Safety

- Process Hazards Analysis (PHA)
- Process Safety Information (PSI)
- Hotwork Permit
- Pre-startup Safety Review (PSSR)
- Contractor Safety

Response/Planning

- Emergency Planning and Response (EPR)
- Incident Investigations

We are available to guide, assist, and address your needs for site-specific process safety management programs, individual element development, or even as an experienced and informed sounding board for a second opinion.
