

PIPELINE COMPLIANCE MANAGEMENT PROGRAM

Small to medium-sized pipeline and facility operators often face unique challenges that require specialized, innovative solutions. With limited internal resources and minimal in-house regulatory expertise, ensuring the safe operation of their assets and navigating the complex and ever-evolving regulatory landscape can be difficult.

Regulations such as the PIPES Act of 2020 and the PHMSA Gas Gathering Rule present significant challenges — even for seasoned pipeline operators. For small and medium-sized operators, these complex and dynamic requirements often create uncertainty around how to safely and efficiently manage pipeline assets. Determining how those assets are regulated across multiple federal, state and local agencies can be especially difficult without experienced regulatory employees on staff.

Altamira's Pipeline Compliance Management Program (PCMP) delivers turnkey regulatory and integrity services for operators that do not have a dedicated team to manage their regulated pipeline assets. We translate complex regulatory requirements into practical, audit-ready programs that preserve asset integrity, reduce risk and free your team to focus on the daily core operations.

Our team brings decades of hands-on experience as both pipeline operators and consultants — giving us a unique perspective. We regularly support pipeline clients of all sizes with the safe operation of their pipeline assets.

Your team can benefit from Altamira's all-inclusive PCMP or a customized support package tailored to your specific operational needs. Our flexible approach helps mitigate the risks inherent in pipeline operations and maintenance, protect the integrity of your assets through their entire life-cycle and ensure full compliance with regulations.

GAIN PEACE OF MIND WITH TURNKEY PIPELINE INTEGRITY & COMPLIANCE SOLUTIONS

Our all-inclusive PCMP's are priced based on each client's unique assets, meaning you get access to all our services for a fixed price that is tailored to your operations. Alternatively, we can create a custom solution with the specific services needed to augment your current internal teams capabilities.

PCMP SERVICES INCLUDE:

- 811 One-calls / Damage Prevention
- Annual Cathodic Protection Testing
- Annual High Consequence Area (HCA) and Structure Verification Reports
- Annual Leakage Survey
- Annual Program Reviews
- Annual National Pipeline Mapping System (NPMS) Submissions
- Annual PHMSA and State Reporting
- Atmospheric Corrosion Monitoring
- Bi-Monthly Cathodic Protection Rectifier Inspection
- Management of Pipeline Data and Required Documentation
- Navigable Water Crossing Inspections
- Overpressure Protection Inspection
- Planning and Budgeting Cycles for Related Pipeline Activities
- Right-of-Way Inspections
- Scheduled Stakeholder Monthly Meetings
- Threat Assessment and Annual Evaluation of IMP
- Upkeep of Regulatory Compliance Changes
