

PROCESS SAFETY MANAGEMENT

A sound Process Safety Management (PSM) program is crucial for business continuity, loss control, regulatory compliance and environmental protection. Altamira's experienced consultants can audit, develop, implement and maintain your process safety program using a risk-informed approach and deep knowledge of codes and standards.

We offer services such as Process Hazard Analysis, Program Audits and Inspections, Consulting, Program Development and Training to ensure compliance with OSHA's PSM and EPA's RMP regulations, keeping your employees safe and your company compliant.

PROCESS SAFETY MANAGEMENT EXPERTISE

Altamira's comprehensive PSM training and consulting services help our clients identify and manage risks associated with their operations. Risk identification methodologies include various techniques of Process Hazards Analysis (PHA), including HAZOP and "What If" checklists. Our professionals have decades of process safety experience in the energy, chemical, food & beverage and industrial industries that use OSHA's PSM or EPA's RMP regulations, bringing practical application to risk mitigation.

OUR PSM SERVICES:

- Implementing a new PSM system
- Evaluating PSM system implementation and performance
- Integrating new PSM elements into an existing PSM system
- Improving an existing PSM element or system
- Specific Examples:
 - Facilitate Process Hazard Analysis (PHA) 5-Year Revalidations
 - Facilitate Project Detail Design Process Safety Reviews
 - Facilitate 3-Year Compliance Audits
 - Generate Process Safety Information for New Facilities
 - Improving a Facility's Management of Change (MOC) Process
 - Improving a Facility's Incident Investigation Process
 - Leading Formal Incident Investigations
